NEW! TRIPLE-ACTION Soft-Close, Soft-Open & Push-To-Open

Technical Specifications

Weight Options
Optimal performance with versions for **up to 135 lbs and 180 lbs.**

Door Width
Fits narrow doors 24″ and up.

Compatibility
Works with all specs of our SMARTtrack and VARIOpocket, including frameless glass clamps and recessed wood mounts.

Tried & Tested
Like all our products, the Push-Two-Soft has been tested to at least 100,000 cycles at full weight capacity.

Quick Install
Installs as quickly as our Soft-Stop, and keeps all adjustability without damaging the wall. **Attention:** Can only be fitted to products marked ***Ready for Push-Two-Soft.***

Advantages of Falkenstein Pocket Solutions

With a full aluminum track and framing solution, the **VARIOpocket**, and a universal track, the **SMARTtrack**, Falkenstein offers a solution for any pocket application. Our systems combine German engineering, craftsmanship and innovative solutions for age-old problems.
Not only are our products made to be adjusted on-site quickly and easily, they are also designed to be adjustable and serviceable without breaking any drywall.

The Track-in-Track remote adjustment mechanism allows for pocket side door stop adjustments without access to the pocket.

Maintain with Ease

Featuring an inspection opening and our Track-in-Track mechanism, our pocket systems allow for easy access, adjustments and maintenance of all parts inside of the track without breaking any drywall.

Stopper Adjustability

The stopper positions (and optional Soft-Stop or Push-To-Open) can be adjusted even if the wall is closed without the need to open the drywall again. Soft-Open can be retrofitted at any time as long as the door panel can be removed.

Fits All Kinds of Doors

Our pocket hardware offers ample customization options. This includes the top-mount wood door hardware included as standard, optional recessed wood mounts for a reduced clearance between track and door as well as clamps for frameless glass panels.

Quick Installation

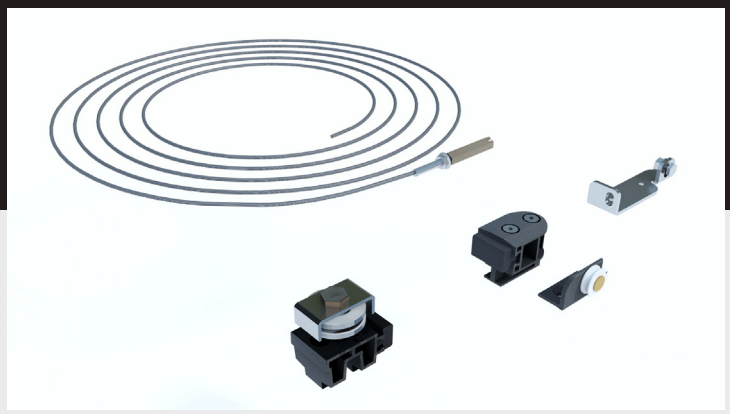

Unlike typical cassette-style pockets, our **VARIOpocket** comes together right inside of the rough opening. This makes it easier to adjust to the specific conditions, and a lot quicker to install compared to traditional solutions.

ADA Compliance

- Our pocket systems are designed to accommodate door sizes and configurations suitable for ADA-compliant installations
- Tested for ADA-compliant operating forces with door weights up to 180 lbs*

*Final ADA compliance depends on the complete door installation, accessories used and local site conditions, including proper level and plumb installation.

Synchro for wood doors

- Both doors can open and close simultaneously using a cable
- For two wood doors up to 180 lbs per door panel
- Comfortable operation with one hand
- Compatible with Soft-Close and Soft-Open hardware
